

Anubhav Maurya

MERN Stack Developer · Full-Stack Engineer

+91 75709 82834 | anubhavmaurya2204@gmail.com | github.com/anubhavmaurya22 | linkedin.com/in/anubhav-maurya-973482379

SUMMARY

B.Tech CS student at PSIT Kanpur building production-grade full-stack web apps with React, Node.js, and MongoDB (MERN stack). Comfortable owning the full lifecycle — from local development to live deployment — writing REST APIs, integrating third-party services, and managing NoSQL schemas. Ships real products, not just tutorials.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), Python, Java, HTML5, CSS3

Frontend

React.js, Responsive UI, Component Design

Backend

Node.js, Express.js, REST APIs, Firebase

Database

MongoDB Atlas, NoSQL Design

DevOps & Tools

Git, Vercel, Render, Kali Linux

PROJECTS

Root Bridge · rootbridge-zeta.vercel.app

React.js · Firebase Auth · Real-time DB · Vercel · Component Architecture

- ▶ Built a full-stack web application with React — modular, responsive component system built from scratch.
- ▶ Integrated Firebase for real-time data synchronisation and token-based user authentication, equivalent to integrating third-party services in MERN roles.
- ▶ Set up and maintained production CI/CD pipelines on Vercel with continuous rollout.
- ▶ Structured application state and data flow across components, mirroring Express.js middleware patterns.

Huddle · huddle-in83.onrender.com

Node.js / Express-style API · Python Backend · MongoDB Atlas · JavaScript Frontend · Render

- ▶ Engineered a RESTful API backend in Python — same design principles as Express.js (routing, request handling, JSON responses) — consumed by a JavaScript-driven frontend.
- ▶ Designed NoSQL schemas in MongoDB Atlas with a focus on efficient querying and persistent data storage.
- ▶ Configured production deployment on Render: environment variables, build scripts, health checks, and service configuration.
- ▶ Debugged cross-origin API integration and resolved frontend-backend data flow issues end-to-end.

EDUCATION

B.Tech — Computer Science

PSIT Kanpur

2023 – Present (2nd Year)

Class XII — Higher Secondary

Completed 2023

Class X — Secondary

Completed 2021

CURRENTLY LEARNING

Expanding into Native Android Development — applying the same full-stack mindset to mobile: local state management, REST API integration, and deployment to the Play Store. Actively deepening expertise in Node.js & Express.js to complete the MERN stack.

STRENGTHS

Full-Stack Thinking

Live Deployments

API Integration

Auth Systems

Self-Motivated
